

# ARE YOU PREPARED TO RESPOND TO ANTISEMITISM ON YOUR CAMPUS?

College can be an exciting time, but it can be particularly challenging for those who identify as Jewish.

Antisemitism is an insidious form of hate that continues to be a threat. Nearly one-third of Jewish students in the U.S. have personally experienced antisemitism on campus.\* This can impede a student's ability to participate in classes, join clubs and display their Jewish identity proudly.

ADL and Hillel International have partnered to develop

## ANTISEMITISM ON CAMPUS

a self-paced, interactive, digital learning module for students.

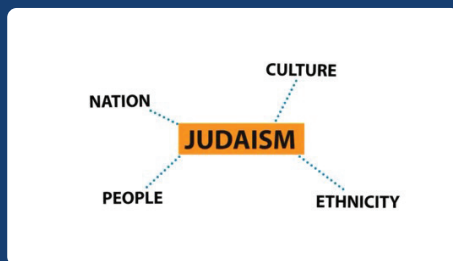

\* The ADL-Hillel Campus Antisemitism Survey: 2021

This interactive learning module empowers student communities to be more inclusive. It can be distributed as a proactive tool and in response to antisemitic incidents on campus.

## This 75-minute learning experience:

- Helps students understand the variety of Jewish identities and experiences
- Offers common language and context for understanding the genesis of antisemitism
- Provides tools and strategies for identifying and responding to antisemitism on campus
- Empowers students to make their campus a more welcoming and inclusive community

### The module covers relevant topics including:

The Jewish People

Antisemitism Myths and Tropes

Encountering Antisemitism

Jewish History

The Pyramid of Hate

“The section that went into depth about the different ways antisemitism can manifest was very informative and something I hadn’t seen summarized in one place before.”

—College Student
