

THE 4 PILLARS TO CHALLENGE ANTISEMITISM

ADL Education's pillars reflect our philosophy by which one recognizes and builds an understanding of antisemitism and takes steps to challenge it.

Explore Jewish Identity

Recognize Jewish identity through the lens of peoplehood, religion and culture. Explore Jewish narratives to embrace diverse experiences of Jewishness and connected identities.

Examine Antisemitism

Define antisemitism as a persistent form of oppression that targets Jewish people, Judaism, Israel and Zionism. Examine anti-Jewish stereotypes and myths. Investigate manifestations of antisemitism from ancient history to the modern day; explore the impact on the Jewish people

Challenge Antisemitism

Analyze antisemitism as a complex system that harms society at large, not only the Jewish community. Evaluate the relationship between antisemitism and other forms of oppression in perpetuating injustice across society. Build the capacity to recognize anti-Jewish bias within oneself, others and institutions.

Champion Justice

Put into practice skills to confront antisemitism within oneself, others and institutions and become a change agent in one's community and society. Apply this understanding to champion a more equitable and just society through education, advocacy and allyship to confront antisemitism.
